UserVoice Enhancements to Agency Integrator for February 17, 2024

Items in this section were submitted and voted on by our User Community (you!) using the UserVoice tool. UserVoice can be accessed by clicking the **Resources** menu and selecting **Enhancement Request**.

Module	Section	Enhancement
Application	Premium Detail Tab	The **Premium Detail tab** has undergone a UI refresh and is now accessible from the same menu. The updated version offers all the same functions as the previous one, but now has a new look and feel that matches other transitioned modules. A **Duration** dropdown has been added to the **Premium/Est Annualized Comm** section, and a new section called **Premium History** is now available. This section displays the **Before** and **After** value of each premium field by **Application Status**. This new feature lets you quickly and easily view the premium history.

Changes to Agency Integrator for February 17, 2024

Module	Section	Change
Application	Memos Tab	If you attempted to send a memo to a recipient with a 0% split, even if they were the **Primary Agent**, the memo would not have been delivered to them. This was the case even if you had used the **MEMOSALLAGENTS** preference and checked the memo box on the **Agents tab** of an Application. However, this issue has now been resolved.
Commissions	Adjustment Administration	Previously, the **Commission Adjustment Administration** did not display the total amount, dropping anything after the decimal. This is now resolved.
General	Download Resources	Downloading **Commission**, **Contact Import Templates**, and **API** resources is now possible without encountering errors.
