Note:

- *Core feature* = feature is active for applicable users automatically (some configuration may be needed / desired)
- *Exploitable feature* = feature can be turned on / off by the client

FIXES

- **MIB ACORD Update:** *(Applies to all Resonant users)*

The previous default was ACORD version 2.34 when submitting MIB requests. Going forward, MIB is planning to restrict support to the 6 most recent versions. In preparation of this we made the ACORD version a configurable property so carriers can update the version from the Configurations page when needed. MIB's most current ACORD version is 2.47.00 and it has been set as the default for Resonant.

- **MIB XML 'Update' Transactions (402) are Updated per MIB's Data Sharing Standard for 'Product Type':** *(Applies to all Resonant users)*

The MIB 'update' transaction has been modified to be compliant with MIB standards by omitting the 'Product Type' from the 402 transaction.
