

04-01-2026 Resonant 4.4.7 4.5.7 4.6.8 5.0.3 5.1.2 Patch Release Notes

Product release notes for all products can be viewed on the iPipeline [Customer Portal](#). To receive automatic notifications when new release notes are published, log onto the iPipeline Customer Portal, go to *Resources > Release Notes* and select the product(s) that you would like to receive notifications for.

Resonant: 4.4.7 | 4.5.7 | 4.6.8 | 5.0.3 | 5.1.2

Release Date: April 01, 2026

Note:

- *Automatic feature* = feature is automatically available with base upgrade
- *Requires Activation* = feature must be turned on / configured (an additional cost may apply)
- *Requires Changes* = feature requires the client to make changes to existing implementation to avoid errors / loss of product performance (see the [Requires Changes](#) section below for details on any required actions).

4.4.7 FIXES

- [UNDQUO-2772](#) - **Fix Resonant docker error allowing use of Linux2023 AMIs:** (*All Carriers*)
- Automatic

Resolved code that was failing to get the container ID now allowing containers to start successfully while using Amazon Linux2023 AMIs.

4.5.7 and 4.6.8 FIXES

- **Includes the 4.4.7 fix identified above, plus...**
- [UNDQUO-2417](#) - **Fix to data collision issue:** (*All Carriers*) - Automatic

Resolved a data collision issue that occurred when multiple 103s are submitted for cases while backend services/job are running or UI changes are made.

- [UNDQUO-2568](#) - **ExamOne MVR - no longer batching responses for states AK, CA, HI:** (*Carriers integrating with ExamOne for Motor Vehicle Report*) - Requires Activation

An ExamOne change where they no longer batch responses broke MVR orders for the states of AK, CA, and HI. As a solution we have introduced a new Integration configuration for 'ExamOne - MVR' where the states specified will use asynchronous results.

Property Name	Property Value	Default Value	Modified By	Last Modified
Req Account Number	test		Admin Admin	8/20/2020 10:25:42 AM
Asynchronous Result Received States	USA_AK,USA_CA,USA_HI	USA_AK,USA_CA,USA_HI	Admin Admin	8/20/2020 12:28:58 PM

By default these states will continue to be set to accept results asynchronously... to resolve the issue introduced by the ExamOne change, where they no longer support batched responses for these states, edit the config setting shown above by removing the states.

5.0.3 FIXES

- Includes the 4.4.7, 4.5.7, and 4.6.8 fixes identified above, plus...

- [UNDQUO-2569](#) - **ExamOne LabPiq order not moving the ReqStatus to 'Requested':** (*Carriers integrating with ExamOne for LabPiq*) - Automatic

Now when submitting a LabPIQ (ExamOne) requirement, the requirement status immediately changes from Added to Requested when the request is sent.

- [UNDQUO-2612](#) - **Links feature config: (All carriers)** - Automatic

We have introduced a way to allow a carrier to turn the Links feature ON or OFF... with the default set to OFF (via the app level config set to **linksFeatureEnabled=false**).

- [UNDQUO-2747](#) - **Hide the 'Links' header & tab when the feature is OFF: (All carriers)** - Automatic

When the the Links feature is disabled via the app config setting, the Links header and tab will be hidden.

- [UNDQUO-2640](#) - **Update needed to receive MIB Code: (Carriers integrating with MIB)** - Automatic

We now allow the MIB check to receive a build code with *SEN*, example 6.2.265SEN.

- [UNDQUO-2712](#) - **MIB Validation - Add TransExe date and time:** (*Carriers integrating with MIB*) - Automatic
Support was added for the *TransExeDate* and *TransExeTime* in the MIB Update transaction.

5.1.2 FIXES

- **Includes the 4.4.7, 4.5.7, 4.6.8, and 5.0.3 fixes identified above, plus...**
- [UNDQUO-2493](#) - **Poller services nodes assignment being added to stale nodes:** (*All carriers*) - Automatic
A fix was made to ensure that after an AWS restart the background services should get assigned to currently active tasks/nodes.
- [UNDQUO-2574](#) - **Case Status feed not accepting non-mandatory feeds for Requirements:** Requires Activation
We have introduced a way to allow a carrier to accept updates on 125 and 1125 feeds for non-mandatory feeds (ReqIndicator=0)... with the default behavior set to exclude non-mandatory requirements (via the app level config set to ***excludeNonMandatoryReqsIn125=true*** and ***excludeNonMandatoryReqsIn1125= true***).
- [UNDQUO-2599](#) - **HoraceMann MVR - Add additional fields to standard data model:** (HoraceMann): Automatic
The following additional database fields added to the standard MVR data model.
 - life_mvrinquiry/NumIncidents
 - life_mvrintcident/ViolationConvictionCode
